

NETGEAR GS748PP Nepārvaldīts Gigabit Ethernet (10/100/1000) Power over Ethernet (PoE) Pelēks

Zīmols : NETGEAR

Preces kods: GS748PP-100EUS

Modeļa nosaukums : GS748PP

NETGEAR GS748PP. Slēdža tips: Nepārvaldīts. Basic switching RJ-45 Ethernet portu veids: Gigabit Ethernet (10/100/1000), Basic switching RJ-45 Ethernet portu daudzums: 48. Pilns duplexs. Adrešu tabulas izmērs: 8000 ieraksti. Tīkla standarts: IEEE 802.1p, IEEE 802.3az. Power over Ethernet (PoE). Statņa montāža

| Vadības īpašības                                |                                | Energijas pārvaldība                            |             |
|-------------------------------------------------|--------------------------------|-------------------------------------------------|-------------|
| Slēdža tips *                                   | Nepārvaldīts                   | Jaudas avots *                                  | AC/DC       |
| Quality of Service (QoS) atbalsts               | ✓                              | Mainstrāvas ievades spriegums                   | 100 - 240 V |
| Savienojamība                                   |                                | Mainstrāvas ievades frekvence                   | 50/60 Hz    |
| Basic switching RJ-45 Ethernet portu daudzums * | 48                             | Ieejas strāva                                   | 8 A         |
| Basic switching RJ-45 Ethernet portu veids *    | Gigabit Ethernet (10/100/1000) | Strāvas patēriņš (maks)                         | 410 W       |
| Tīklošana                                       |                                | Power over Ethernet (PoE)                       |             |
| Tīkla standarts *                               | IEEE 802.1p, IEEE 802.3az      | Power over Ethernet (PoE) *                     | ✓           |
| Vara Ethernet kabeļu tehnoloģija                | 10BASE-T                       | Power over Ethernet (PoE) jauda uz pieslēgvietu | 30 W        |
| Pilns duplexss                                  | ✓                              | Kopējais Power over Ethernet (PoE) budžets      | 380 W       |
| Plūsmas kontroles atbalsts                      | ✓                              | Papildus informācija                            |             |
| Linka sakopošana                                | ✓                              | Savienojamības tehnoloģija                      | Vadu        |
| Ethernet LAN datu pārsūtīšanas ātrums           | 1000 Mbit/s                    | Joslas platums                                  | 96 Gbit/s   |
| Datu pārraide                                   |                                | Garantijas periods                              | 2 gads(i)   |
| Adrešu tabulas izmērs *                         | 8000 ieraksti                  | Ārējās vides apstākļi                           |             |
| Maksimālais datu pārsūtīšanas ātrums            | 1 Gbit/s                       | Darbības temperatūras amplitūda (T-T)           | 0 - 50 °C   |
| Jumbo Frames atbalsts                           | ✓                              | Uzglabāšanas temperatūras amplitūda (T-T)       | -20 - 70 °C |
| Jumbo rāmji                                     | 12,288                         | Darbības relatīvā mitruma amplitūda             | 10 - 90%    |
| Pakešu buferatmiņa                              | 1,5 MB                         | Ekspluatācijas augstums                         | 0 - 3000 m  |
| Dizains                                         |                                | Karstuma izkliedēšana                           | 34,2 BTU/h  |
| Statņa montāža *                                | ✓                              | Svars&dimensijas                                |             |
| Produkta krāsa                                  | Pelēks                         | Platums                                         | 440 mm      |
| Lieko ventilatoru atbalsts                      | ✓                              | Dziļums                                         | 310 mm      |
| Ventilatoru skaits                              | 2 ventilators/ ventilatori     | Augstums                                        | 43 mm       |
| Darbības rādītāji                               |                                | Svars                                           | 4,6 kg      |
| Vidējais laiks starp kļūmēm (MTBF)              | 570972 h                       | Sertifikāti                                     |             |
