

## Motorola XT420 rācija 16 kanāli 446.00625 - 446.19375 MHz Melns

**Zīmols :** Motorola

**Preces kods:** RMP0166BHLAA

**Modeļa nosaukums :** XT420

Motorola XT420. Mērķis, rezultāts: Multi-Use Radio Service (MURS) diapazons, Kanālu skaits (kopējais): 16 kanāli, Darbības frekvence: 446.00625 - 446.19375 MHz. Baterijas mūža ilgums: 20 h. Platums: 58 mm, Dziļums: 40 mm, Augstums: 116 mm. Baterijas tehnoloģija: Litija jons

| Darbības rādītāji                  |                                          | Tehniskā informācija                  |             |
|------------------------------------|------------------------------------------|---------------------------------------|-------------|
| Kanālu skaits (kopējais) *         | 16 kanāli                                | Produkta krāsa                        | Melns       |
| Pieejamie kanāli                   | 8 kanāli                                 | Automātiska kanāla meklēšana          | ✓           |
| Darbības frekvence *               | 446.00625 - 446.19375 MHz                | Svars&dimensijas                      |             |
| Mērķis, rezultāts *                | Multi-Use Radio Service (MURS) diapazons | Platums                               | 58 mm       |
| Enerģijas pārvaldība               |                                          | Dziļums                               | 40 mm       |
| Atkārtoti uzlādējams               | ✓                                        | Augstums                              | 116 mm      |
| Baterijas mūža ilgums              | 20 h                                     | Svars                                 | 244 g       |
| Tehniskā informācija               |                                          | Iepakojuma saturs                     |             |
| International Protection (IP) code | IP55                                     | Daudzums *                            | 1           |
| Enerģijas taupīšanas režīms        | ✓                                        | Lādētājs                              | ✓           |
| Pārraides jauda                    | 500 mW                                   | Ārējās vides apstākļi                 |             |
| Signālu daudzums                   | 6                                        | Darbības temperatūras amplitūda (T-T) | -30 - 60 °C |
| Integrēts on/off slēdzis           | ✓                                        | Baterija                              |             |
|                                    |                                          | Baterijas tehnoloģija                 | Litija jons |
