EF 24mm f/1.4L II USM Lens

Canon EF 24mm f/1.4L II USM Lens:

The EF 24mm f/1.4L II USM prime lens delivers outstanding image quality, with a f/1.4 maximum aperture allowing hand-held shooting in low light, or night photography using a tripod. The wide 84-degree angle of view gets more in the frame and the large aperture can be used to restrict depth of field, even at such short focal lengths. Be prepared for split-second moments with a fast, responsive Auto Focus with Ultra-Sonic Motor (USM) using optional full-time manual override making it possible to adjust focus without leaving AF mode. An excellent choice for those looking to shoot professional, high-quality photography or video in varied locations – this lens is part of the Canon professional L-series flagship range, designed for robust handling and resistant to dust and moisture.
