** Based on consumer testing in Germany comparing leading One Touch (Coffee + Milk) Full Automatic Espresso Machines (2023)

***When compared to previous Philips espresso machines

*****Based on 8 filter replacements, as indicated by the machine. Actual number of cups depends on selected coffee varieties, rinsing and cleaning patterns

12 hot and iced coffee options, Quickly froth milk with the LatteGo milk system, QuickStart for fast brewing, SilentBrew technology for quiet coffee brewing, Aquaclean filter for quick descaling

EP4446/70

Highlights

12 hot and iced drinks

Our 12 recipes range from warming drinks like espresso, milky lattes and cappuccinos, right through to cooling iced coffees. We've calibrated our brewing system so even iced coffees have the same delicious flavour as hot drinks.

LatteGo milk system

With the Philips automatic coffee machine, our powerful cyclonic frothing technology lets you create silky-smooth milk froth the touch of a button, even with plant-based milk alternatives.

QuickStart

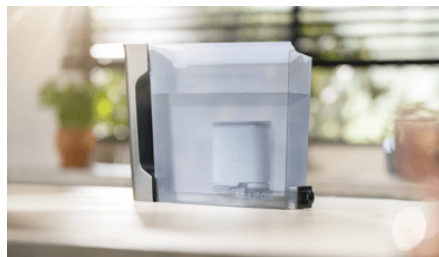

No more waiting for your espresso machine to warm up. Our QuickStart function allows you to power up your machine and brew a coffee right away. Your Philips fully automatic coffee maker will heat up based on the selected recipe, so you can enjoy your coffee without the wait.

100% ceramic grinders

Bring out the full flavour of your beans with our hard-wearing ceramic grinder. Fine-tune the grind size using one of 12 settings, from fine to coarse.

AquaClean filter

Brew up to 5000 cups without having to descale using an AquaClean filter. It purifies water before brewing begins so your coffee tastes more flavoursome.

Eco Settings

Use one of five Eco Settings to reduce water and energy consumption, without compromising on coffee quality. Our 4400 series allows you to dim the main and cup lights earlier than the default time, use less water while rinsing, switch to standby mode more quickly, or dim brightness.

SilentBrew technology

Our patented SilentBrew technology reduces machine sounds so you can enjoy the experience of brewing aromatic coffee more. Using sound shielding and quiet grinding, our machines make 40% less noise than earlier models and come with a Quiet Mark certification.

The fastest to clean milk system*

With just two parts and no tubes, our milk system can be cleaned in under 10 seconds, in the dishwasher or under a tap. Philips doesn't offer automatic cleaning as it requires complementary cleaning.

Perfect temperature and aroma

Our Aroma Extract system finds the ideal balance between temperature and aroma by keeping the water temperature between 90°C and 98°C, all while regulating the water flow rate.

Specifications

Safety feature

Automatic shut-off timer: Yes
Safety certification: Yes

Technical specifications

Energy Efficiency rating: Class A
Power: 1500 W
Voltage: 230 V
Frequency: 50 Hz
Number in pack: 1

Weight and Dimensions

Product Length: 433 mm
Product Width: 246 mm
Product Height: 371 mm
Product Weight: 8 kg
Package Length: 491.5 mm
Package Width: 287.5 mm
Package Height: 478 mm
Package Weight: 10-12.3 kg

Durability
