

## Axagon PCEE-GIX tīkla karte Iekšējs Ethernet 1000 Mbit/s

**Zīmols :** Axagon

**Preces kods:** PCEE-GIX

**Modeļa nosaukums :** PCEE-GIX

Axagon PCEE-GIX. Iekšējs. Savienojamības tehnoloģija: Vadu, Saimnieka interfeiss: PCI Express, Interfeiss: Ethernet. Maksimālais datu pārraides ātrums: 1000 Mbit/s

| Savienojamība                            |                                                                                                         | Dizains                              |           |
|------------------------------------------|---------------------------------------------------------------------------------------------------------|--------------------------------------|-----------|
| Savienojamības tehnoloģija *             | Vadu                                                                                                    | Plug and Play                        | ✓         |
| Saimnieka interfeiss *                   | PCI Express                                                                                             | LED indikatori                       | ✓         |
| Interfeiss *                             | Ethernet                                                                                                | Izcelsmes valsts                     | Ķīna      |
| Ethernet LAN (RJ-45) pieslēgvietu skaits | 1                                                                                                       | Sertifikācija                        | CE, RoHS  |
| PCI versija                              | 2.1                                                                                                     | <b>Sistēmas prasības</b>             |           |
| PCI kartes formas standarts              | Pilna augstuma (zema profila)                                                                           | Atbalstītās Windows operētājsistēmas | ✓         |
| <b>Tīklošana</b>                         |                                                                                                         | Mac operētājsistēmas atbalstītas     | ✓         |
| Maksimālais datu pārraides ātrums *      | 1000 Mbit/s                                                                                             | Linux operētājsistēma atbalstīta     | ✓         |
| Tīkla standarts *                        | IEEE 1588, IEEE 802.1Q, IEEE 802.1Qav, IEEE 802.3, IEEE 802.3ab, IEEE 802.3az, IEEE 802.3u, IEEE 802.3x | Citas atbalstītās operētājsistēmas   | ✓         |
