4	01 Object of the declaration (identification of toy allowing traceability). It shall include a colour image of sufficient clarity to enable the identification of the toy. 02 Предмет на декларацията (идентификационен номер на детската играчка, позволяващ проследяването ѝ). Включва цветно изображение, което е достатъчно ясно, за да позволи разпознаване на играчката. 03 Object de la déclaration (identification du jouet que permet sa traçabilité). Inclure une image en color de nitidez suficiente para permitir la identificación del juguete. 04 Předmět prohlášení (identifikace hračky umožňující ztěžně ji vysledovat). Zahnuje dostatečně zřetelné barevné zobrazení, na jehož základě lze danou hračku identifikovat. 05 Erklæringsgenstand (identifikation af legetøjet, så det kan spores). Den skal indeholde et farvebillede, der er tilstrækkeligt klart til, at legetøjet kan identificeres. 06 Gegenstand der Erklärung (Bezeichnung des Spielzeugs zwecks Rückverfolgbarkeit). Sie enthält eine hinreichend deutliche Farabbildung, auf der das Spielzeug erkennbar ist.	07 Deklarēeritav toode (mānuskasja identifikēseerimis, mis vāimāldab toodet jālgdja). Siia alla kuuluib piisavalt selge mānuskasja vārikuujutis mānuskasja identifikēseerimiseks. 08 ΣΤΟΧΟΣ ΤΗΣ ΔΗΛΩΣΗΣ (ΤΑΥΤΟΠΟΙΗΣΗ ΤΟΥ ΠΑΙΧΝΙΔΙΟΥ ΠΟΥ ΕΠΙΤΡΕΠΕΙ ΤΗΝ ΙΚΝΗΑΣΙΜΟΤΗΤΑ). ΠΕΡΙΕΧΕΙ ΕΓΧΡΩΜΗ ΕΙΚΟΝΑ ΕΠΑΡΚΟΥΣ ΔΙΑΥΓΕΙΑΣ ΓΙΑ ΝΑ ΕΙΝΑΙ ΕΥΚΑΙΡΗ Η ΤΑΥΤΟΠΟΙΗΣΗ ΤΟΥ ΠΑΙΧΝΙΔΙΟΥ. 09 Object de la déclaration (identification du jouet permettant sa traçabilité), accompagnée d'une image couleur suffisamment claire pour permettre l'identification du jouet. 10 Předmět izjave (identifikace hračky kojom se omogučava sledljivost). Uključuje i sliku u boji dovoljno jasnoće koja omogućuje identifikaciju igračke. 11 Oggetto della dichiarazione (identificazione del giocattolo che ne consente la rintracciabilità). E' inclusa un'immagine a colori di chiarezza sufficiente a permettere l'identificazione del giocattolo. 12 Deklarācijas priekšmets (rotālietas identifikācija, kas nodrošina tās izsekjamību). Tajā iekļauj pietiekami skaidru krāsainu rotālietas attēlu, lai varētu to identificēt. 13 Deklaracijos objektas (žaislo identifikavimo ženklas, pagal kurį ji galima atsekti). Kartų pateikiamas spalvotas atvaizdas, pakankamai aiškus, kad būtų galima žaislą identifikuoti.	14 A nyilatkozat tárgya (a nyomon követhet lehetővé tevő játék azonosítója). A játék azonosítását lehetővé tevő, megfelelően látható színes képet kell tartalmaznia. L-g han tal-dikjarrazzjoni (i-identifikazzjoni unika tal-gugarell i tippermetti t-raccabbiltà). Għandha tinkludi xiebja bil-kulur ta' ċarezza suffiċjenti biex iku jista' jiġi identifikat id-għaliq. 15 Voorwerp van de verklaring (beschrijving aan de hand waarvan het speelgoed kan worden getraceerd). Hierin is ook een afbeelding in kleur opgenomen die voldoende duidelijk is om het speelgoed te kunnen identificeren. 16 Przedmiot deklaracji (identyfikator zabawki umożliwiający odtworzenie jej historii). Zawiera dostatecznie wyraźne kolorowe zdjęcie umożliwiający identyfikację zabawki. 17 Objeto da declaração (identificação do brinquedo que permita rastreá-lo). Deve incluir uma reprodução a cores suficientemente clara de forma a permitir identificar o brinquedo.	19 Obiectul declarației (identificare a jucăriei permitând trasabilitatea). Include o imagine colorată, suficient de clară pentru a permite identificarea jucăriei. 20 Předmět vyhlášení (identifikácia hračky umožňujúca výsledovateľnosť). Obsahuje dostatočne zrozumiteľný farebný obrázok, ktorý umožňuje identifikáciu hračky. 21 Predmet izjave (identifikacija igrače, ki omogoča sledljivost). Izjava vsebuje dovolj jasno barvno sliko, ki omogoča identifikacijo igrače. 22 Vakuutusken kohde (jäljittävyyden mahdollista leln tunnist). Siihen sisällytettään riittävä värillinen kuva, jolla tunnistamisen mahdollistuuksiksi. 23 Föremål för försäkran (identifera leksaken så att den kan spåras). Den ska innehålla en färgbild som är så tydlig att det går att spåra leksaken.	CE

Part I: Physical Safety Assessment

SECTION 1 – Description			
Item/Concept Name:	31152		
Detailed Description:	42"/1.07m Colorsphere beach ball		
Materials Used:	PVC		
Age Grading:	Over 3 years		

Executive Summary

SECTION 2 – Foreseeable Use

Intended/Foreseeable Use	Children will play as intended. Children may roll, kick and throw the ball on the land and yard and even mis-used it in water as floatation kit.
--------------------------	---

SECTION 3 – Mechanical/Physical Compliance Findings

EN71-1	<u>Europe</u> The product is likely to comply with the requirements for children under 3 years based on the play feature, construction and design. Non-conformity was not identified during this review, but the following requirements should be noted for the compliance. - Mold flash shall not be present - No sharp point/edge can be found - Materials used in the toy shall be clean
--------	---

SECTION 4 – Product Design Evaluation

Risk Assessment Recommendations:

Major Concerns	<u>Drowning Hazards</u> If the consumers use this beach ball in water as treat it as floatation kit, there is a risk of lost buoyance if the heat seam is damaged or the air valve is open during use.  <i>Actions: For further reduce the risk of drowning, it is recommended to make warning statement on the packaging and on toys, such as “Warning: It is not an aquatic toys, not be used in water.”.</i>
----------------	--

Minor Concerns

Airway obstruction

The beach balls may present the airway obstruction hazard to young child if the stopper of the valve became detached. However, this hazard is minor for the accessed samples as the stopper was not detached after test.

Besides, the plastic film may also present an airway obstruction if it was not well finished and became detached as small part. However, this hazard is reduced as the hot melted seams are well finished.

Action: the hazard can be reduced by strengthening the stopper and making it can withstand 90 N tension test; and making sure all film seams are well finished.

Impact

The beach ball could present an impact hazard if the child throws the ball to other body's face or other body part. However, this hazard is inherent with the similar item due to its function, this hazard is slightly reduced due to the soft material.

*Action: This hazard may be reduced by:
Always keeping adult supervision while playing*

Suffocation

The plastic sheeting and poly bag may present suffocation hazard if the children cover it on the face. However, this hazard is minor as the thickness of plastic sheeting are more than 0.038 mm.

Action: this hazard can be reduced by making the thickness of the plastic film and the poly bags more than 0.038mm.

Critical Manufacturing Concerns	Heavy elements content and raw materials should be controlled, especially lead in paint and phthalates, which are involved large number of US CPSC and REPAX recall cases. Material controlling should be well done in manufacturing procedure. The item should be manufactured in a clean environment and this should be closely monitored throughout production to avoid external contamination. Mould flash and process burrs should be controlled throughout production in order to reduce laceration hazards from sharp points or edges
---------------------------------	--

SECTION 5 – Flammability

EN71-2	This product is likely to comply with the requirements of EN71 Part 2.
--------	--

SECTION 6 – Hygiene

2009/48/EC	According to New Toy Directive, toys must be designed and manufactured in such a way as to meet hygiene and cleanliness requirements in order to avoid any risk of infection, sickness or contamination.
------------	--

SECTION 7 – Radioactivity

Radioactivity	This product has no characteristic related to this hazard.
---------------	--

SECTION 8 – Applicable European Directives, Regulations and Harmonized Standards

Applicable Standards	EU Toy Safety Directive (2009/48/EC) - EN 71-1 Safety of toys - Mechanical and physical properties - EN 71-2 Safety of toys - Flammability - EN 71-3 Safety of toys - Migration of certain elements Flame Retardant-TCEP & TCPP & TDCPP Content(Directive 2014/79/EU, amendment of 2009/48/EC) Migration BPA(Directive 2014/81/EU, amendment of 2009/48/EC) REACH Annex XVII – Restrictions - Cadmium - Organotins - Phthalates - PAHs Regulation (EC) 1907/2006, REACH, Article 33 - Substances of very high concern (SVHCs) on the current candidate list Regulation (EU) No 519/2012 - Short Chain Chlorinated Paraffin (SCCP) Content Packaging Waste Directive (Pb + Cd + Hg + Cr VI) (94/62/EC)
----------------------	---

Other Test Recommendations	EN 71-9 Safety of Toys - Organic Chemical Compounds EN71-12 nitrosamines Germany AfPS GS 2014:01 – PAHs Denmark Statutory Order No. 1082-Lead
	Gulf Countries - GSO EN 71-1 Safety of toys - Mechanical and physical properties - GSO EN 71-2 Safety of toys - Flammability - GSO EN 71-3 Safety of toys - Migration of certain elements

SECTION 9 – Labelling Assessment

CE Mark	Yes Note: For the new Toy Directive the CE mark must be visible at the point of sale.
Labeling	All texts required shall be written in the official language of the country in which the toy is to be sold. New Toy Safety Directive (2009/48/EC) The following information should be present on the product itself, it can be present on the packaging/instruction if the toy it-self is technically/economically not possible. - Batch/Serial/Model Number - Manufacturer name and address - Importer name and address The CE marking must be affixed visibly, legibly and indelibly to the toy, to an affixed label or to the packaging. It must be visible at the point of sale. 
Instruction	Below instruction is recommended to make warning statement on the packaging and on toys, such as “Warning: It is not an aquatic toys, not be used in water.”

SECTION 10 – Recall Case Study

1 of 2 photos [Previous](#) [Next](#)

Alert number: A12/1461/15

Category: Toys

Product: Beach ball

Brand: Biltema

Name: Beach ball

Type / number of model: 45-917

Batch number / Barcode: Unknown

Risk type: Environment

The red plastic in the beach ball contains up to 0.31 % by weight short chain chlorinated paraffins (SCCP). The placing on the market and use of articles containing SCCPs is banned. SCCPs persist in the environment, are toxic to aquatic organisms at low concentrations and bioaccumulate in wildlife and humans, posing a risk to human health and the environment.

The product does not comply with the Regulation on persistent organic pollutants (POP Regulation).

Measures taken by economic operators: Withdrawal of the product from the market (By: Manufacturer)

[View less](#)

Description: Red beach ball packaged in plastic packaging

Country of origin: Unknown **Alert submitted by:** Sweden

Risk level: Serious

Year - Week: 2015 - 47

Products were found and measures were taken also in: Finland

Part II: Chemical Safety Assessment

Summary and Recommendation

None of the materials listed in the submitted BOM is identified from the substances that are classified as CMR of categories 1A, 1B or 2 under Regulation (EC) No. 1272/2008, substances which are Persistent, Bioaccumulative and Toxic (PBT) and very Persistent and very Bioaccumulative (vPvB), restricted substances listed on Annex XVII of REACH and SVHCs on Candidate List. It is also recommended to review the manufacture process to ensure these substances are not added.

The test listed in the table “**Applicable European Directives, Regulations and Harmonized Standards**” are recommended for compliance testing, in order to reduce unintentional chemical risk such as contamination of material during production process.

Chemical management from incoming material to finish product throughout the supply chain is an important part for fulfilling complex and ever-changing chemical requirements. The “**Universal Chemical Safety Assessment**” provided additional information to assist manufacturer in reviewing the manufacturing process, it is to ensure the chemical properties of a toy manufactured through such process is consistence to the BOM stated.

Universal Chemical Safety Assessment

The following assessment was based on worst case scenario by assessing the possibility of existing of hazardous chemical in the material given in the BOM submitted.

Product classification:

A. New Toy Safety Directive (2009/48/EC)

i: The PVC parts of the BEACH BALL (SAMPLE) are likely to be defined as **scraped-off toy materials**. These materials are **accessible** to children when the SAMPLE is used as intended or in a foreseeable way, when taking into accounts the behavior of children.

Component No.	Material	Accessible as defined by EN 71-1?
1-2	Poly(vinyl chloride) (PVC)	Yes

The CMR substances in categories 1A, 1B and 2 and the 19 elements should fulfill the chemical requirements of Part III, Annex II of 2009/48/EC unless they are **inaccessible**.

ii: The SAMPLE is likely to be defined as a **non-scented** toy. The likelihood of the occurrence of 66 allergenic fragrances will not be assessed.

iii: Referring to the explanatory guidance document¹, nitrosamines and nitrosatable substances are relevant in particular for rubber or finger paints. Since the SAMPLE does not contain these materials, assessment for nitrosamines and nitrosatable substances in the SAMPLE will not be necessary.

B. REACH (Regulation (EC) No 1907/2006)

i: The SAMPLE is likely to be defined as an **article with substances not intended to be released and substance** under normal and foreseeable conditions of use.

Remark:

¹Referring to the explanatory guidance document (**rev 1.9**) published by the European Commission of **Feb 10, 2016**, nitrosamines and nitrosatable substances are relevant in particular for rubber and finger paints.

(http://ec.europa.eu/growth/sectors/toys/safety/guidance/index_en.htm)

Chemical requirements under new Toy Safety Directive and REACH:

New Toy Safety Directive (2009/48/EC)	CMR substances :	Any substance that is classified as CMR categories 1A, 1B or 2 is prohibited to be used in the SAMPLE unless the substance is below the concentration limit set in Regulation (EC) No 1272/2008 ² . The occurrence of CMR substances in the ABC is assessed in this report.
	19 Elements ³ :	The manufacturer of the SAMPLE has to confirm that the migration levels of the restricted elements are under the defined maximum permitted levels in pliable and scraped-off toy materials. Safety assessment on the migration of the 19 elements is not suggested ⁴ .
	55 Fragrances ⁵ :	55 fragrances are banned (subject to concentration up to 100 mg/kg when their presence is technically unavoidable under good manufacturing practice). The SAMPLE is non-scented toy. The likelihood of the occurrence of the fragrances is very low. Therefore, safety assessment of 55 fragrances is not performed.
	11 Fragrances ⁵ :	11 fragrances are permitted but must be labeled if the concentration of each exceeds 100 mg/kg. Safety assessment of 11 fragrances is also not performed on the SAMPLE as they are non-scented.
	Nitrosamines and nitrosatable substances :	Nitrosamines and nitrosatable substances are banned in toys for children under 36 months or for toys that are intended to be placed in the mouth. As the SAMPLE does not contain rubber or finger paints, nitrosamines and nitrosatable substances are normally of real concern, thus these substances will not be assessed in this report.
REACH (Regulation (EC) No 1907/2006)	SVHCs :	EU importer may obtain from the manufacturer of the SAMPLE regarding SVHC information to pass along the supply chain if the SAMPLE contains over 0.1% w/w of a SVHC on Candidate List ⁶ . The likelihood on the presence of SVHCs in the ABC is assessed in this report.
	Restricted substances :	Restricted substances for which Annex XVII of REACH contains a restriction relevant to toy materials and children's products should not be used in the SAMPLE unless the restricted condition is complied. The likelihood on the presence of restricted substances in the SAMPLE is listed in this report.

Remarks:

²Maximum concentration of the substance regulated under the new Toy Safety Directive (2009/48/EC), CMR categories 1A, 1B and 2, that can be present in toys, components of toys or micro-structurally distinct parts of toys. Referring to Appendix B(2) of Directive 2009/48/EC, the relevant concentration for the classification of mixtures containing the substances should be those established in accordance with Regulation (EC) No 1272/2008 (with amendment referring to Commission Regulation (EU) No 286/2011) from Jun. 1, 2015.

In case the limit for a substance is set in EN 71-9 and this limit is lower than the specific concentration and the generic limit for a CMR substance in accordance with Regulation (EC) No 1272/2008 (with amendment referring to Commission Regulation (EU) No 286/2011), the limit in EN 71-9 will be used.

³The list of 19 elements is available in Annex II Part III (13) of Directive 2009/48/EC.

⁴According to EN 71-3, there is no relationship between the total element content of a toy material and the soluble migration of that element under standard test conditions. Therefore, measuring the total element content and converting the result to give a soluble element figure is not an answer to this problem.

As presented by Maureen Logghe from the European Commission on the topic of European Commission Toys Standards, the timeframe for the European Committee for Standardization (CEN) to revise EN 71-3 to meet the requirements of Directive 2009/48/EC is four years from his presentation, ie. before 2013.

(http://corporate.nca.ie/eng/Business_Zone/Product_Safety_and_Recalls/Toy_Safety/toy-safety-seminar/NCA-toy-seminar-Maureen-Logghe-Standards-061010.pdf)

⁵The list of fragrances is available in Annex II Part III (11) of Directive 2009/48/EC.

⁶SVHCs on Candidate List is updated by the European Chemicals Agency (ECHA) on a periodic basis.

(http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp)

Conclusion:

Although the data indicates a number of injuries and a number of fatalities involving inflatable pool and toy, given the exposure of these items to the population it is thought that there may be a relatively low probability of injury resulting from their use and that injuries may be unlikely to be severe.

BOM (Bill of Materials)
