

## TP-Link TL-SG116E Nepārvaldīts L2 Gigabit Ethernet (10/100/1000) Melns

**Zīmols :** TP-Link

**Preces kods:** TL-SG116E V1

**Modeļa nosaukums :** TL-SG116E

TP-Link TL-SG116E. Slēdža tips: Nepārvaldīts, Slēdža līmenis: L2. Basic switching RJ-45 Ethernet portu veids: Gigabit Ethernet (10/100/1000), Basic switching RJ-45 Ethernet portu daudzums: 16. Pilns duplexs. Adrešu tabulas izmērs: 8000 ieraksti, Komutācijas ietilpība: 32 Gbit/s. Tīkla standarts: IEEE 802.1Q, IEEE 802.1p, IEEE 802.3, IEEE 802.3ab, IEEE 802.3u

| Vadības īpašības                                |                                                                 | Dizains                                   |             |

| Linka sakopošana                                | ✓                                                               | Ārējās vides apstākļi                     |             |
| Apraides vētras kontrole                        | ✓                                                               | Darbības temperatūras amplitūda (T-T)     | 0 - 40 °C   |
| Ātruma limitēšana                               | ✓                                                               | Uzglabāšanas temperatūras amplitūda (T-T) | -40 - 70 °C |
| Auto MDI/MDI-X                                  | ✓                                                               | Darbības relatīvā mitruma amplitūda       | 10 - 90%    |
| Automātiska vienošanās                          | ✓                                                               | Uzglabāšanas relatīvā mitruma amplitūda   | 5 - 90%     |
| Kabeļa garuma noteikšana                        | ✓                                                               | Karstuma izkliedēšana                     | 31,68 BTU/h |
| Atbalsta VLAN                                   | ✓                                                               | Svars & dimensijas                        |             |
| Virtuālā LAN īpašības                           | Tagged VLAN, Protocol-based VLAN                                | Platums                                   | 286 mm      |
| VLAN skaits                                     | 32                                                              | Dziļums                                   | 111,7 mm    |

| Datu pārraide           |                              | Svars&dimensijas                |               |
|-------------------------|------------------------------|---------------------------------|---------------|
| Komutācijas ietilpība * | 32 Gbit/s                    | Augstums                        | 25,4 mm       |
| Pakešu apstrādes jauda  | 23,81 miljons pakešu sekundē | Iepakojuma saturs               |               |
| Adrešu tabulas izmērs * | 8000 ieraksti                | Pievienoti kabeli               | AC            |
| Uzglabāt un pārsūtīt    | ✓                            | Ātrās startēšanas gids          | ✓             |
| Rindu skaits            | 4                            | Informācija par iepakojumu      |               |
| Jumbo Frames atbalsts   | ✓                            | AC adapteris komplektā          | ✓             |
| Jumbo rāmji             | 10000                        | Gumijas apakša                  | ✓             |
| Pakešu buferatmiņa      | 4,1 MB                       | Iepakojuma platums              | 170 mm        |
| Drošība                 |                              | Iepakojuma dziļums              | 412 mm        |
| IGMP iejaukšanās        | ✓                            | Iepakojuma augstums             | 70 mm         |
| Loop aizsardzība        | ✓                            | Iepakojuma svars                | 1,36 kg       |
|                         |                              | Sertifikāti                     |               |
|                         |                              | Sertifikācija                   | FCC, CE, RoHS |
|                         |                              | Logistiskie dati                |               |
|                         |                              | Harmonizētās sistēmas (HS) kods | 85176990      |
