

## i-tec TB5QUATTRODOCKPD dokstacija Vadu Thunderbolt 5 Melns

**Zīmols :** i-tec

**Preces kods:** TB5QUATTRODOCKPD

**Modeļa nosaukums :** TB5QUATTRODOCKPD

i-tec TB5QUATTRODOCKPD. Savienojamības tehnoloģija: Vadu, Saimnieka interfeiss: Thunderbolt 5, USB barošana līdz: 140 W. Ethernet LAN datu pārsūtīšanas ātrums: 10,100,1000,2500 Mbit/s. Produkta krāsa: Melns, Saderīgās atmiņas kartes: MicroSD (TransFlash), SD, Datu pārsūtīšanas ātrums: 120 Gbit/s. Barošanas avota veids: AC, Barošanas avots: 160 W, Izejas spriegums: 21 V. Citas atbalstītās operētājsistēmas: Android, ChromeOS, iPadOS

| Savienojamība                                        |                          | Darbības rādītāji                       |                           |
|------------------------------------------------------|--------------------------|-----------------------------------------|---------------------------|
| Savienojamības tehnoloģija *                         | Vadu                     | Kabeļu bloķēšanas slota veids           | Kensington                |
| Saimnieka interfeiss *                               | Thunderbolt 5            | Produkta krāsa *                        | Melns                     |
| USB 3.2 Gen 2 (3.1 Gen 2) A tipa pieslēgvietu skaits | 4                        | Integrēts on/off slēdzis                | ✓                         |
| USB 3.2 Gen 2 (3.1 Gen 2) C tipa pieslēgvietu skaits | 1                        | LED indikatori                          | ✓                         |
| USB barošanas padeve                                 | ✓                        | Energijas pārvaldība                    |                           |
| USB barošana līdz                                    | 140 W                    | Barošanas avota veids                   | AC                        |
| HDMI pieslēgvietu skaits *                           | 2                        | Barošanas avots                         | 160 W                     |
| Thunderbolt 5 portu skaits                           | 2                        | Izejas spriegums                        | 21 V                      |
| Kopējā pieslēgvietu austiņām/mikrofonam              | ✓                        | Izejas strāva                           | 7,61 A                    |
| Austiņu savienojamība                                | 3,5 mm                   | Savienojamie strāvas kontaktdakšu veidi | EU                        |
| DC ieejas ligzda                                     | ✓                        | Programmatūra                           |                           |
| Tīklošana                                            |                          | Atbalstītās Windows operētājsistēmas    | ✓                         |
| Ethernet/LAN savienojums *                           | ✓                        | Mac operētājsistēmas atbalstītas        | ✓                         |
| Ethernet LAN (RJ-45) pieslēgvietu skaits             | 1                        | Linux operētājsistēma atbalstīta        | ✓                         |
| Ethernet LAN datu pārsūtīšanas ātrums                | 10,100,1000,2500 Mbit/s  | Citas atbalstītās operētājsistēmas      | Android, ChromeOS, iPadOS |
| Darbības rādītāji                                    |                          | Svars&dimensijas                        |                           |
| Integrēts karšu lasītājs *                           | ✓                        | Platums                                 | 154 mm                    |
| Saderīgās atmiņas kartes                             | MicroSD (TransFlash), SD | Dziļums                                 | 96 mm                     |
| Datu pārsūtīšanas ātrums                             | 120 Gbit/s               | Augstums                                | 45 mm                     |
| Maksimālā digitālā izšķirtspēja                      | 7680 x 4320 pikseli      | Svars                                   | 692 g                     |
| Atbalstītais ekrānu skaits                           | 4                        | Iepakojuma saturs                       |                           |
| Maksimālais atjauninājuma ātrums                     | 240 Hz                   | Pievienoti kabeļi                       | Thunderbolt               |
| Kabeļa saslēga slots                                 | ✓                        | AC adapteris komplektā                  | ✓                         |
|                                                      |                          | Manuāls                                 | ✓                         |
