

## TP-Link TL-SG1024D Nepārvaldīts Gigabit Ethernet (10/100/1000) Pelēks

**Zīmols :** TP-Link

**Preces kods:** TL-SG1024D V6

**Modeļa nosaukums :** TL-SG1024D

TP-Link TL-SG1024D. Slēdža tips: Nepārvaldīts. Basic switching RJ-45 Ethernet portu veids: Gigabit Ethernet (10/100/1000), Basic switching RJ-45 Ethernet portu daudzums: 24. Pilns duplexs. Adrešu tabulas izmērs: 8000 ieraksti, Komutācijas ietilpība: 48 Gbit/s. Tīkla standarts: IEEE 802.3ab, IEEE 802.3u, IEEE 802.3x. Saspraudnis: DC-līgзда. Statņa montāža

| Vadības īpašības                                |                                        | Energijas pārvaldība                      |                     |
|-------------------------------------------------|----------------------------------------|-------------------------------------------|---------------------|
| Slēdža tips *                                   | Nepārvaldīts                           | Mainīstrāvas ievades frekvence            | 50 - 60 Hz          |
| Quality of Service (QoS) atbalsts               | ✓                                      | Strāvas patēriņš (maks)                   | 13,62 W             |
| Savienojamība                                   |                                        | Power over Ethernet (PoE)                 |                     |
| Basic switching RJ-45 Ethernet portu daudzums * | 24                                     | Power over Ethernet (PoE) *               | ✗                   |
| Basic switching RJ-45 Ethernet portu veids *    | Gigabit Ethernet (10/100/1000)         | Papildus informācija                      |                     |
| Gigabit Ethernet (copper) pieslēgvietu skaits   | 24                                     | Dimensijas (WxDxH)                        | 294 x 180 x 44 mm   |
| Saspraudnis                                     | DC-līgзда                              | Savienojamības tehnoloģija                | Vadu                |
| Tīklošana                                       |                                        | Joslas platums                            | 48 Gbit/s           |
| Tīkla standarts *                               | IEEE 802.3ab, IEEE 802.3u, IEEE 802.3x | Jaudas prasības                           | 100 - 240V, 50/60Hz |
| 10G atbalsta *                                  | ✗                                      | Tīklošanas īpatnības                      | Gigabit Ethernet    |
| Kabeļu tipi, kas ir atbalstīti                  | Cat3, Cat4, Cat5, Cat5e                | Savienojamības LEDs                       | ✓                   |
| Pilns duplexss                                  | ✓                                      | Ārējās vides apstākļi                     |                     |
| Plūsmas kontroles atbalsts                      | ✓                                      | Darbības temperatūras amplitūda (T-T)     | 0 - 40 °C           |
| Auto MDI/MDI-X                                  | ✓                                      | Uzglabāšanas temperatūras amplitūda (T-T) | -40 - 70 °C         |
| Automātiska vienošanās                          | ✓                                      | Darbības relatīvā mitruma amplitūda       | 10 - 90%            |
| Datu pārraide                                   |                                        | Uzglabāšanas relatīvā mitruma amplitūda   | 5 - 90%             |
| Atbalstāmie datu pārraides ātrumi               | 10/100/100 Mbps                        | Darbības temperatūras amplitūda (T-T)     | 32 - 104 °F         |
| Komutācijas ietilpība *                         | 48 Gbit/s                              | Karstuma izkļiedēšana                     | 46,44 BTU/h         |
| Pakešu apstrādes jauda                          | 35,7 miljons pakešu sekundē            | Svars&dimensijas                          |                     |
| Adrešu tabulas izmērs *                         | 8000 ieraksti                          | Platums                                   | 294 mm              |
| Uzglabāt un pārsūtīt                            | ✓                                      | Dziļums                                   | 180 mm              |
| Maksimālais datu pārsūtīšanas ātrums            | 1 Gbit/s                               | Augstums                                  | 44 mm               |
| Jumbo Frames atbalsts                           | ✓                                      | Iepakojuma saturs                         |                     |
| Jumbo rāmji                                     | 10000                                  | Pievienoti kabeli                         | AC                  |
| Protokoli                                       |                                        | Lietotāja pamācība                        | ✓                   |
| Atbalstāmie tīkla protokoli                     | CSMA/CD, TCP/IP                        | Statīva montēšanas piederumi              | ✓                   |

| Dizains                       |             | Informācija par iepakojumu      |               |
|-------------------------------|-------------|---------------------------------|---------------|
| Statņa montāža *              | ✓           | Iepakojuma tips                 | Kaste         |
| Sakraujams *                  | ✓           | Iepakojuma platums              | 250 mm        |
| Produkta krāsa                | Pelēks      | Iepakojuma dziļums              | 400 mm        |
| LED indikatori                | ✓           | Iepakojuma augstums             | 80 mm         |
| Enerģijas pārvaldība          |             | Iepakojuma svars                | 1,95 kg       |
| Jaudas avots *                | AC          | Sertifikāti                     |               |
| Strāvas barošana iekļauta *   | ✓           | Sertifikācija                   | FCC, CE, RoHS |
| Mainstrāvas ievades spriegums | 100 - 240 V | Logistiskie dati                |               |
|                               |             | Harmonizētās sistēmas (HS) kods | 85176990      |
